## CLOUD COMPUTING, HOSTING, AND COLOCATION SERVICES

- **Flex Colocation.** Locate your hardware in one of our secure racks. We support any type of network hardware, whether it is a server, SAN, switch, or PBX, if you can plug it into a network, we can house it. You can manage them remotely or we can manage them for you.
- **Hosting.** Dedicated or virtual server. *Dedicated* is a physical server that is not shared with any other customer. *Virtual* is a dedicated VMware virtual machine that is not shared with any other customer. Dedicated or Virtual, our hosted systems will support any operating that will run in a virtual environment. You can manage them remotely or we can manage them for you.
- **Cloud Computing.** Only pay for the computing resources you use. Load your own VMware virtual machine to our cloud or let us create the instances for you. You use them however and whenever you want.

### Benefits:

- **Always up.** 100% uptime guarantee for Managed Hosting and Cloud Computing Platform
- **Eliminate cost.** Eliminate the capital cost to build and operational cost to maintain your own server rooms and data centers
- **Increase agility.** Quickly add or remove computing resources based on your business needs.

### Features:

- **Redundancy.** Power and cooling with N+1 redundancy
- **Multiple OS Support.** Our platform supports all major server operating systems
- **Availability.** Battery and generator backup power
- **Bandwidth.** Gigabit connections available with all tier 1 ISPs
- **Quality.** SAS 70 Type II compliant for Colocation and Data Center Services
- **Security.** 24x7 security guard, unmarked building, video surveillance, biometric access controls
